# Angel Eye Headlight Wiring Instructions

## 3 Series

99 thru 05

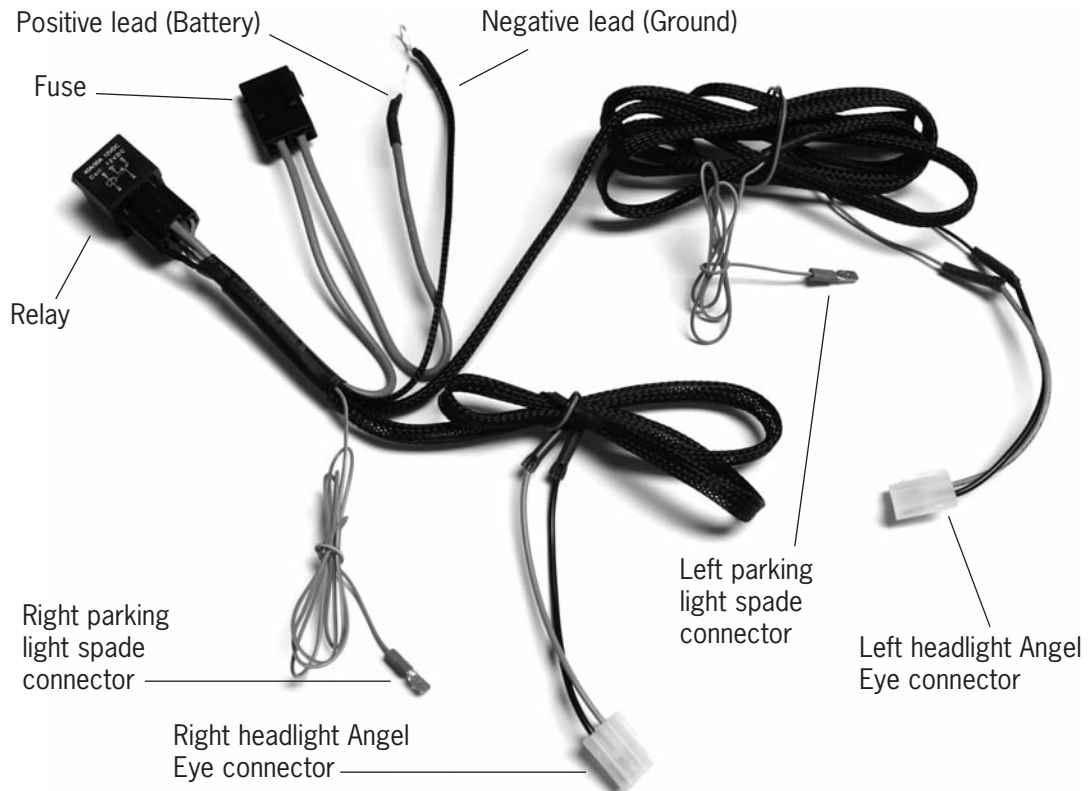

### KIT NUMBERS:

E46LHL-BXXXXXX

Angel Eye Headlight Kits

### PROCEDURE:

1. Connect the positive lead to a constant 12-volt source, such as the positive terminal junction block behind the passenger side strut tower.
2. Connect the negative lead to a ground source, such as the grounding terminal near the positive block or a strut tower stud/nut.
3. Connect the left and right parking light spades to the positive wires of the left and right parking lights using the supplied crimp-on female "T" terminals.
4. Connect the left and right Angel Eye connectors to the white plastic plugs from the left and right headlight assemblies.
