**Annual Inspection.** Once a year, or every 15,000 miles, you should inspect drive belts, water pump and fan clutch, coolant hoses, suspension and steering linkages and joints, driveshaft flex discs, engine and transmission mounts, brake pads/rotors/calipers/hoses, exhaust systems, fluids, etc., looking for premature wear. Bavarian Otto has made a three-part DIY video that shows you how to perform these inspections yourself. You can watch it at [blog.BAVauto.com/go/inspection](http://blog.BAVauto.com/go/inspection).
