# Changing the Language on Clock/Temp Unit

## 3 Series

92 thru 99

### PARTS LIST:

62 13 8 357 666

### PROCEDURE:

*This unit comes set to language of German and 24 hour (military) time readout. To switch to US/English and 12 hour time display, follow the following steps:*

1. With the key in the “on” position, press the “10” and “1000” buttons on the left hand side of the unit.
2. The word “function” (in german) will appear.
3. Tap the “1” button twice. The display will show “Function 00” the first time the “1” button is depressed, and “Function 01” the second time the “1” button is depressed. (Each of these “Functions” are used to change a different option/setting on the unit—“Function 01” happens to be the language function).
4. Once the “Function 01” is displayed, tap the “Set/Res” button. The display will say “Sprach” which is German for language. Tap the “1” button until “American” is displayed, then hit the “Set/Res” button to accept American as the language.
5. To change the time display from 24 hour time to 12 hour (AM/PM) time, repeat the above steps, but tap the “1” button three times to display “Function 03”, then hit “Set/Res” to accept. The display should say “Uhr 24” – this means “24 hour” in German. Tap the “1” button to change the display to “Uhr 12”, for 12 hour time. Then hit the “Set/Res” button to accept this selection.
6. To test that these options have been selected, turn the key to the “off” position, then back to the “on” position.
